Education

Des Moines Area Community College | Associate in Applied Science **Ankeny, IA**
Cybersecurity • GPA: 3.84 May 2026
Relevant Coursework: IT and Security Fundamentals, Linux Network Administration, Cloud Systems Administration, Server Administration, Netplus Administration, Cybersecurity Analyst, Ethical Hacking Prac CyberSec, Database Concepts for Cyber, Python I and II, C#, Intro to Programming Logic, Intro to Database, and Applied Computer Security Lab
Dean's List Spring 2024
President's List Summer 2024, Fall 2024, Spring 2025, Fall 2025, and Spring 2026

Des Moines Area Community College | Associate in Applied Science **Ankeny, IA**
Digital Forensic Investigation • GPA: 3.84 December 2025
Relevant Coursework: E-Crime Investigative Methods, Forensic Prac Cybersecurity, Digital Forensic Analysis I, Digital Forensic Analysis II, and Mobile IoT Forensics
President's List Summer 2025

Skills

Security & Forensics: Penetration Testing, Digital Forensics & Incident Response (DFIR), Vulnerability Assessment, Threat Hunting, Network Traffic Analysis, Log Analysis, Active Directory Security, Security Alert Triage, Threat Detection, Incident Investigation

Tools: Nmap, Metasploit, Burp Suite, Nessus, Wireshark, Hashcat, Autopsy, EnCase, FTK, Zeek/RITA, Snort, Wazuh, SentinelOne

Systems & Infrastructure: Windows Server, Linux (Kali, Ubuntu, AlmaLinux), Azure, Active Directory, pfSense, Microsoft Intune/SCCM

Languages: Python, PowerShell, Bash, SQL, C#

Experience

Tenax – Urbandale, IA
Associate Security Analyst | August 2026 to Current

- Lead multiple network penetration testing engagements, identifying high-risk vulnerabilities and assessing security weaknesses across external attack surfaces.
- Conduct external penetration tests and social engineering assessments to evaluate organizational security posture and identify exploitable risks.
- Document findings, assess vulnerability severity, and provide actionable remediation recommendations to strengthen security.
- Monitor SIEM alerts and perform security alert triage, event analysis, and threat detection.
- Analyze Windows event logs and investigate security events, documenting findings.
- Develop, tune, test, and validate Wazuh detection rules to improve alert accuracy.
- Use SentinelOne to monitor endpoint security alerts and investigate suspicious activity.
- Conduct security investigations, perform alert prioritization, document findings, and escalate incidents as needed

Solutions Management Group – Ankeny, IA
Service Desk Analyst | September 2025 to August 2026

- Document and track incident reports through ticketing systems to ensure timely issue resolution and accurate case management
- Provide technical support to end users through troubleshooting, remote support tools, and customer service assistance
- Assist users with account management tasks including password resets, permissions, and Active Directory configurations
- Coordinate hardware replacements, device setup, and workstation troubleshooting for end-user systems
- Troubleshoot Windows operating systems, software issues, connectivity problems, and user access concerns
- Escalated suspected account compromises, partnering with Network Security to support investigation, remediation, and confidential handling of sensitive incidents

Solutions Management Group – Ankeny, IA
Intern | June 2025 to September 2025

- Performed hardware diagnostics, troubleshooting, repairs, and upgrades on desktop and laptop systems
- Installed, configured, and updated software to maintain system functionality and technology standards
- Assisted customers with device setup, hardware installation, and basic technical support
- Documented repair processes, troubleshooting steps, and service outcomes for tracking and quality assurance
- Supported end users with workstation issues, software problems, and general device maintenance
- Improved customer satisfaction by delivering timely, accurate, and professional technical support

Certifications

- CompTIA CySA+ — Issued December 2025, Expires December 2028
- Microsoft Azure Fundamentals (AZ-900) — July 2024

Leadership & Competitions

- Secretary, Information Systems Security Association, Des Moines Chapter – October 2026 - Current
- National Cyber League Participant
- Iowa State Cyber Defense Competition — December 2025
- International Iowa State Cyber Defense Competition – February 2026
- NCAE Cyber Games — February 2026
- Member, Cyber Threat Club, Des Moines Area Community College

Technical Training

- TryHackMe – Hands-on cybersecurity labs and practical exercises
- Competency in Networking through CompTIA Network+ Coursework — May 2025
- TestOut Linux Pro — April 2024
- TestOut IT Fundamentals Pro — April 2024

Projects

Multi-Hop Network Pivoting & ProxyChains Lab

- Practiced network reconnaissance, port scanning, and service enumeration across segmented lab networks using Nmap and Netdiscover.
- Configured multi-hop SSH tunnels and ProxyChains to access and scan systems on otherwise unreachable subnets.
- Practiced exploitation of vulnerable services and credential analysis using Metasploit and Hashcat in a controlled lab environment.

UnrealIRCd Vulnerability Assessment & Exploitation Lab

- Performed network reconnaissance and service enumeration using Netdiscover and Nmap to identify exposed services on a Metasploitable 2 target.
- Exploited the UnrealIRCd 3.2.8.1 backdoor vulnerability using Metasploit, demonstrating remote code execution and obtaining root access in a controlled lab environment.
- Evaluated the vulnerability's severity, documented evidence of access, and recommended remediation through immediate service updates.

Windows Registry Forensics Automation Tool | Python, Regipy, Eric Zimmerman Tools

- Developed a Python-based forensic tool integrating Regipy and Eric Zimmerman tools to automate Windows Registry artifact extraction and support digital forensic investigations.
- Automated collection of key forensic artifacts to streamline investigative workflows and reduce manual analysis.

SOC Incident Analysis & Threat Detection

- Analyzed security logs and alerts in recurring SOC-style scenarios to identify suspicious activity and potential threats.
- Investigated Windows security events and correlated log data to assess incidents and determine appropriate response actions.
- Documented investigation findings, assessed alert severity, and practiced incident triage and escalation procedures.

Android Application Forensics — AnkiDroid 2.23.3

- Examined an Android application's SQLite database and supporting files to understand how content, application settings, and history are stored.
- Analyzed database tables and relationships to identify user-generated content, metadata, and review timestamps.
- Compared database contents to validate how user activity populated application data.
